

Job Posting

Job Title: Construction & Maintenance Assistant
Location: Roosevelt, UT
Reports to: Construction Supervisor

Job Description

The focus of this position is the planning and execution of oilfield facility construction, including tank batteries, artificial lift equipment and pipelines. You are responsible for aligning the cost and results of projects with company objectives and values. You will work to promote a safe, responsible, and cooperative work environment among company and vendor personnel. You must demonstrate a clear understanding of organizational objectives; ensure proper cost controls; help develop construction plans; attain emission control standards; and ensure successful execution of construction plans, while maintaining behavior consistent with organizational values. Assignments will change frequently.

Accountabilities

- Reports to the Construction and Maintenance Supervisor
- Cooperates and coordinates personally with Facilities and Engineering Teams
- Ensure effective, safe and responsible construction and maintenance operations
- Share responsibility in attainment of HSE/ESG standards, especially emission reduction.
- Demonstrate high level of professionalism and accountability for team results.
- Instill a sense of ownership in organizational performance among frontline personnel.
- Build and maintain strong relationships between the company and all stakeholders, including company personnel, vendors, the community, regulators, and the Tribe.
- Promote cooperation between departments.

Duties

- Provide guidance to Construction Supervisor and other stakeholders regarding current and future projects for the company, and seek continuous improvement of such projects.
- Plan, supervise and improve the PSR process on all FRI facilities which require such.
- Ensure cost controls are implemented to minimize LOE and capital expenditures.
- Set and achieve construction targets which support organizational goals, especially by reducing time to start (POP) or restore (RTP) production.
- Follow the directives of the Supervisor
- Direct and coordinate personnel and projects as assigned

Job Requirements

- Intensive knowledge of oil and gas production and construction in the Uinta Basin
- Leadership experience required (oilfield operations and construction)
- Formal technical training and industry certifications encouraged
- Strong organizational, planning, verbal and communication skills
- Basic computer skills; strong skills in Excel, Word, PowerPoint; WellView familiarity
- Be professional, dependable, and able to work independently; no failed drug tests
- Available 24/7
- Must be eligible to work on the Uintah/Ouray Reservation
